

Laminated Flooring Design Flexibility

Laminated Flooring offers a durable, cost-effective, and stylish finish featuring an easy click-lock installation. Available in numerous colours, textures, and designs, including embossed options that mimic the feel of natural wood. The easy-to-clean, non-porous, and scratch-resistant surface prevents dirt build up. Ideal for lounges, bedrooms, kitchens, hallways and areas with heavy foot traffic, including commercial spaces like hotel rooms and offices.

Key Benefits

- **Durability & Strength:** Constructed with high-density fibre board (HDF), it resists scratches, scuffs, and impacts from high foot traffic and pets.
- **Easy Installation:** Features a click-lock, "floating" system that requires no glue or nails, allowing for quick installation over existing surfaces.
 - **Low Maintenance:** Requires only regular sweeping or vacuuming, with no need for polishing, waxing, or sanding.
 - **Hygienic & Hypoallergenic:** The non-porous, smooth surface does not harbor dust mites or pet dander, improving indoor air quality.
- **Stability & Climate Resistance:** Suitable for homes with varying humidity, as it is designed to handle temperature changes better than wood, including suitability for underfloor heating.
